ABOUT ME

I'm a Software Engineer with over 4 years of experience in various technologies, including PHP (Laravel, Symfony), JavaScript/TypeScript (Node.js, Express, Nestjs), Java (Spring Framework), and front-end frameworks like React.js, Next.js, Angular, and Vue.js/Nuxt.js. I have a strong grasp of databases (MySQL, PostgreSQL, Oracle DB, MongoDB), Linux systems, and Computer Networks.

My expertise extends to Cloud environments like AWS and GCP, where I thrive. I'm proficient in Container/Docker technologies and have worked with mobile development frameworks such as React-Native, Ionic, and Flutter. I'm passionate about staying updated with the latest tech advancements and continually seeking new challenges.

WORK EXPERIENCE

[06/2023 – Current]

Software Engineer

Fidelizarte

City: Porto

Country: Portugal

As a web/mobile developer, I create web systems and apps for clients using technologies like PHP, Laravel, Node.js, MySQL, JavaScript, jQuery, Angular/Ionic, and React/React-Native. I handle full-cycle application development, including testing and deployment. I also have experience in customer interaction to ensure their needs are met.

[08/2022 – Current]

Software Engineer

Comuniverse

City: São Paulo

Country: Brazil

As a full-stack developer, I played a key role in developing, refactoring, and managing projects in education, video streaming, and more. My expertise spans PHP, Laravel, JavaScript/TypeScript, Node.js, React.js, AWS, and Docker. I've also worked with Vue.js/Nuxt.js, Nest.js, and React Native in an Agile team using Scrum/Kanban methodologies.

Our applications reached thousands of users, serving various purposes. I continuously delivered high-quality solutions, meeting evolving user demands.

[04/2023 – 05/2023]

Software Engineer - Consultant

GoBuddy App

City: Porto

Country: Portugal

As a Mobile Development Technical Consultant, I played a key role in the growth of the company's application, serving hundreds of users in the Porto region. My responsibilities included maintaining app integrity, developing new features, and collaborating with an international external team. I utilized Node.js and MongoDB for the backend, Ionic framework with Angular and React for the frontend, and AWS for cloud infrastructure. Additionally, I integrated essential services like Twilio, Stripe, and Magnifinance to enhance app functionality.

[09/2022 – 01/2023]

Software Engineer

Think Attitude

City: Porto

Country: Portugal

As a full-stack developer at SNS/SPMS, I played a crucial role in developing applications for the PEM (Prescrição Eletrónica de Medicamentos / Electronic Prescription of Medicines) project, aimed at modernizing Portugal's healthcare system. In this position, I utilized a range of technologies, including Java, Spring/Spring Boot, JavaScript, JQuery, and Liferay. Working within an Agile team using Scrum, I contributed to building an application that serves the entire National Health system. My dedication to this project has been driven by a passion for improving healthcare services in the country.

[04/2022 – 08/2022]

Software Engineer

Native IP

City: Caxias do Sul, Rio Grande do Sul

Country: Brazil

I provide services as a full-stack javascript developer, creating and making improvements and corrections to the company's products and developing new projects, using modern/legacy javascript technologies. I worked at the company as a freelancer. We use technologies such as AngularJs, React.js, Node.js and Express.js, Electron.js, React-Native and we work in an Agile environment, our product was mainly used by small and medium-sized companies as a cost-effective solution to replace complex callcenter and intelligently automate processes.

[04/2022 – 08/2022]

Software Engineer

NEX - Vendus/Racius

City: Porto

Country: Portugal

As a versatile developer, I handled both backend and frontend tasks, making improvements and adding new features to the company's products. My tech stack included HTML, CSS, JavaScript, JQuery, PHP (Zend Framework/Laminas), MySQL, and AWS, with some Laravel implementations. Applying agile methodologies and advanced development principles like SOLID and Clean Code, our SaaS products became essential tools for thousands of companies.

[01/2022 – 04/2022]

Product Support Engineer

PrimeIT

City: Porto

Country: Portugal

As a Product Support Engineer at Mobilleum, I provided L3 support and conducted developments for the RAID product. I worked with JavaScript/JQuery, Java, Spring, Oracle Database/PL-SQL, and PostgreSQL technologies. My focus was on maintaining the product, supporting users worldwide, and optimizing performance. RAID is widely used in the Telecommunications sector by thousands of companies globally. I am passionate about delivering quality service and contributing to cutting-edge advancements in the industry. Let's connect to explore potential opportunities for collaboration.

[01/2020 – 12/2021]

Software Engineer

Federal University of Alagoas (UFAL)

City: Maceió-AL

Country: Brazil

As a part of the University's IT Sector, our primary focus was to develop and support internal applications/systems. We employed a versatile tech stack, utilizing Java (Spring/

Spring Boot), PHP (Laravel and Symfony), and Node.js for backend development, while employing React.js, Angular, and jQuery for frontend development. Our databases included SQL (Oracle DB, MySQL, PostgreSQL) and NoSQL (MongoDB). Additional technologies like Dockers, Typescript, GCP, SOLID, Scrum/Kanban, Git, and GitHub were also part of our toolkit. The systems we supported were crucial to thousands of students, teachers, and employees, ensuring continuous online availability and seamless performance.

EDUCATION AND TRAINING

[11/2021 – 09/2022]
